DINESH SAMIAH PILLAI

TECHNICAL PRODUCT MANAGEMENT | AI-ASSISTED MODERNIZATION | SOLUTION ARCHITECTURE

Beaverton, OR • (971) 261-7828 • dinu.pillai@icloud.com • linkedin.com/in/[your-profile]

PROFESSIONAL PROFILE

Technical product and solution leader with 20 years in enterprise software delivery, including 14 years in property & casualty insurance. Delivered the architecture and solution design for an Anthropic Claude-assisted modernization of a legacy COBOL/mainframe insurance application to Python, now live in production. AWS Certified Solutions Architect with AI/ML Product Management (ELVTR) and Generative AI (Databricks) training. Works between business stakeholders and engineering on technical feasibility, business cases, architecture trade-offs, and cross-functional delivery.

PROFESSIONAL EXPERIENCE

MPHASIS CORPORATION | Technical Lead / Project Manager / Solution Architect | Aug 2008 – Present

Key client: Oregon Mutual Insurance (2012 – Present)

- Delivered technical architecture and solution design for the Anthropic Claude-assisted conversion of a legacy COBOL/mainframe insurance application to Python; the modernized application is deployed and live in production.
- Lead technical analysis, solution design, and delivery coordination for insurance platforms spanning claims, billing, policy administration, commercial lines, and reporting.
- Architected a resilient AWS serverless OFAC screening integration using EventBridge and Step Functions, removing the need for a costly third-party application upgrade.
- Designed a cloud-based claims letter automation solution using AWS RDS, APIs, and stored procedures, resolving browser-related security concerns and improving application performance.
- Played a key role in migrating legacy IBM Cognos ETL workloads to AWS EMR, improving scalability and processing efficiency.
- Advanced cloud modernization with AWS VPC, SSO, Terraform, Glue, Athena, CloudTrail, and organization-wide security policies.
- Designed a legacy data archival strategy using S3/Glacier lifecycle policies, with cost estimates, to meet insurance record-retention requirements.
- Partner with business stakeholders, engineering, and vendors on architecture trade-offs, feasibility, release readiness, and issue resolution.

UST GLOBAL | Software Engineer | Aug 2006 – Aug 2008

- Evaluated technical solutions against customer requirements, budgets, and product goals, working with engineers and third-party product owners.
- Built prototypes and application interfaces supporting product development within Agile engineering practices.

ADDITIONAL PROJECTS

Insurance VIN Lookup | Socket Integration

Designed and developed a socket-based vehicle lookup integration for insurance online modules, improving response time.

AIG VALIC Fee Disclosure | Compliance Delivery

Prepared high- and low-level designs; coordinated statements of work, stakeholder approvals, development, code review, QA, and deployment.

CORE CAPABILITIES

AI & Modernization: Anthropic Claude; AI-assisted COBOL-to-Python conversion; Generative AI fundamentals; AI/ML product management

Product & Delivery: Technical requirements; feasibility analysis; stakeholder alignment; cost-benefit analysis; business cases; Agile/Kanban; Jira; Confluence

Cloud & Data: AWS (S3, EC2, Lambda, IAM, RDS, EventBridge, Step Functions, EMR, Glue, Athena, VPC); Terraform; Python; SQL Server; DB2; SSIS/SSRS

Insurance: Property & casualty; claims; billing; policy administration; rating; commissions; regulatory reporting

Additional Technologies: COBOL, JCL, IMS DB/DC, CICS, VSAM, GitHub, Azure DevOps, ServiceNow, Linux, Unix shell scripting, PowerShell, CrushFTP

CERTIFICATIONS & EDUCATION

AWS Certified Solutions Architect – Associate (2018) • AI/ML Product Management – ELVTR • Generative AI Fundamentals – Databricks • IBM Certified Database Associate – DB2 (2008)

Bachelor of Engineering, Computer Science | Maharaja Engineering College, Anna University, India | 2006
